Frontend/Backend engineer - Freelance/Project work
September 2022 - December 2024 (2 years 4 months)

Achievements:
- Helped in technical aspects of business decisions - **reduced unnecessary expenses** on API in **~10 times**
- Developed several websites that achieved **100k+ monthly audience**
- Optimized page loading speed for several websites, i moved them from "red" to "yellow" and "green" zones by reducing their loading speed **from ~5 to ~2.5 seconds** - user retention increased
- Made code SEO optimizations for websites, that "revived" websites that lost traffic from search engines (**~0 to ~50k users** in few weeks)
- Developed a Telegram bot with **payment integration** and AI capabilities
- Implemented ChatGPT API to be able to **automatically generate content** for websites
- Created several web scrapers using Node.js and PHP to populate websites with content, resulting in **50k+ users**

Stack: **React, Next.js, JavaScript, TypeScript, JavaScript, Node.js,** Wordpress, PHP

Frontend mobile developer - Meathammer studio
November 2021 - March 2022 (5 months)
Mobile app for "Fair Partner" (cancelled due to war)

Achievements:
- Implemented a page to assist with **tax calculations**
- Implemented **localization** to help users read laws and documents in their original or native languages
- Created pages for collecting essential **employment-related documents**
- Implemented "News" and "Blog" pages to inform users about the latest news and advice
- Improved the user settings page, enabling users to edit essential information

Stack: **React (Native), TypeScript, intl**
